## A DESIGN SOLUTION THAT LEAVES NOTHING TO CHANCE.

At Veritas, we've already done the hard work.

We explored every interior design option, refining our approach until we had developed a **comprehensive package-based solution** that includes every aspect of therapy room design and construction.

We worked with all leading radiation therapy technologies, ensuring that we have a pre-engineered solution for **any type of therapy equipment and any style of room design.**

We developed a **dust-free** interior design package, guaranteeing a clean, maintenance-free work environment.

And we created a **unique modular wall panel system** which allows quick, cost-effective installation; convenient access to electrical wiring and other elements housed behind your walls; and the ability to easily make adjustments to your room setup.

The hard work is done—with Veritas on your side, you have access to today's most innovative, most effective, and most aesthetic therapy room interiors. Leave it to Veritas and leave nothing to chance.

# Therapy Room Interiors

COMPREHENSIVE PRE-ENGINEERED SOLUTIONS

## Modular Wall Panels

The cornerstone of our pre-engineered interior design solution, the Veritas modular wall panel system allows for easy installation and even easier upkeep:

- Completely modular—panels are easily snapped in and out of concealed metal track system
- Allows access to all behind-wall components, including electrical wiring
- Available in high-quality plastic laminate, wood veneer, or metallic laminate
- Limitless finish options—panels can be specified to match any design scheme
- Panels can be easily replaced

## Ceiling Systems

A therapy room ceiling is your primary opportunity to enhance patient comfort while establishing the aesthetic feel of your therapy room. With this in mind, Veritas offers a variety of pre-engineered ceiling options:

- Flat, domed, vaulted, or trayed ceiling packages
- Versatile array of ceiling finishes
- Your choice of embellishments including backlit ceiling panels
- Variety of lighting options including dimmable lighting systems

## Flooring Systems

When it comes to therapy room flooring, Veritas once again defies convention with an advanced design and construction approach focused on making the most of every inch of your floorspace:

- Includes all pre-plumbing and pre-electrical work
- Vast array of flooring finishes
- Flooring systems compatible with all major therapy machines

## Lighting/Electrical

Properly designed lighting is an essential aspect of overall room ambience, patient comfort, and operator productivity. From pre-wiring to light source placement to control panel installation, Veritas will handle all phases of lighting installation. We'll also make sure that all additional electrical work is properly carried out, including high-voltage therapy equipment connections.

## Casework/Sinks/Storage

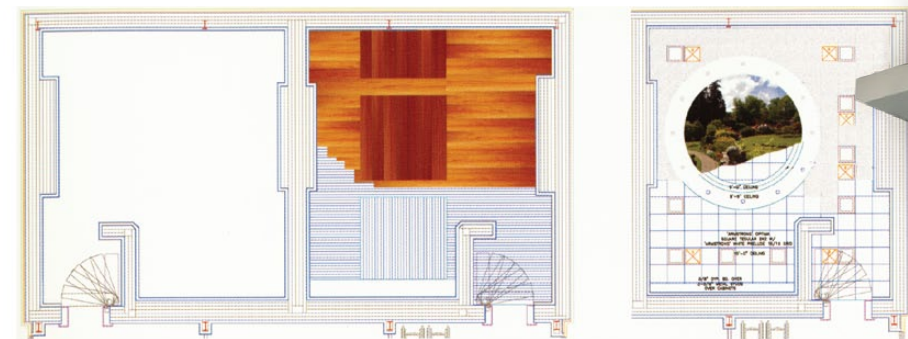

Part of Veritas' seamless, turnkey interior finish solution, our versatile selection of casework, sinks, and storage units provides your therapy room with an additional level of usability. Services include pre-plumbing and pre-wiring as well as design and construction; finishes are designed to complement all accompanying room components.

## Finish Hardware

Finish hardware includes hinges, locking/exit devices, closers, push/pulls and kick plates, doorstops and bolts, and any other necessary hardware. Finish hardware is designed to provide a seamless look across all room components.

## Lasers/Audio/CCTV

Veritas can create a custom laser/audio/CCTV system that meets the unique needs of your facility. Services include all design/engineering, pre-wiring, installation, and testing.

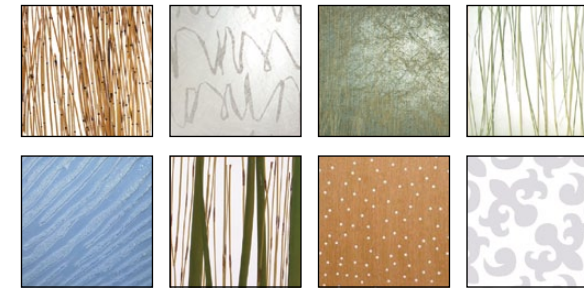

A comprehensive pre-engineered solution, Veritas interiors deliver a modular room design package that covers every inch of your facility.

# Design Packages

To ensure that every one of our customers works in an environment that's as aesthetically pleasing as it is functional, Veritas offers a versatile selection of design packages that span a variety of tastes and moods. Custom design packages can also be created using any combination of room finishes.

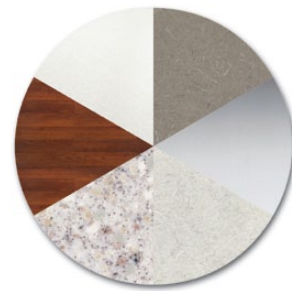

Resin accent panels available in a variety of colors, patterns, and tones.

## THE VERNON

A soothing combination of earth tones and organic textures, the Vernon is a diplomatic declaration of tradition and statesmanship. Design features include lichen and sienna flooring, wall panels with hidden reveals, and soapstone cabinets.

## THE VIRGINIA

Colonial traditions live on with the Virginia (shown above), a testament to a time of quiet sophistication and understated sensibility. Highlights include a beveled ceiling, figured cherry flooring, speckled wall panels, and organic accent panels.

## THE VINTAGE

Understated luxury inspired by the countryside of Southern France. Deep colors and rustic finishes create a warm feel throughout the room. Finish features include rustic stone flooring, mosaic wall panels, and organic accent panels.

## THE VICTORIA

Designed to inspire the same feeling as that first real day of spring, the Victoria features bamboo flooring, riverstone countertops, bridge-pull cabinet hardware, and modern and organic accent panels.

## THE VALENTINO

Penthouse please. The Valentino delivers outright style with clean, crisp lines and a smooth, muted color palette. Highlights include a beveled ceiling, bamboo flooring, silver wall panels, bluestone countertops, and silver cabinet accents.

## THE VERMONT

Summer gives way to fall with the Vermont, a subtle reflection of small-town living. Design highlights include beveled ceiling panels, wall panels with hidden reveals, light-grain cabinets, square metal cabinet hardware, and wood and organic accent panels.

## THE VERONA

Bring the hill country to your patients with this testament to colorful Mediterranean design. Highlights include multi-colored flooring, saffron wall panels, espresso countertops, soapstone cabinets, and wood and organic accent panels.

## THE VIKING

A peaceful mix of blonde Norwegian wood finishes, the Viking provides a bright, modern therapy room interior. Design features include maple wall panels, gold finish cabinets, champagne countertops, and twin-pull cabinet hardware.

## THE VICEROY

Give your therapy room the royal treatment with the Viceroy. Highlighted by an ornate attention to detail, the Viceroy includes a beveled ceiling, tri-color marbled flooring, maple wall panels, stainless steel hardware, and delicately patterned accent panels.

## Leave it to Veritas for a true single-source solution.

A comprehensive pre-engineered solution, Veritas therapy room interiors deliver a modular room design package that covers every inch of your facility. All components ensure a dust-free work environment.
