Custom Door Finishes

Take your room entrance to a whole new level with a custom design or theme. Veritas doors are available with optional finishes or decorative customized art panels. Using your custom artwork, Veritas can produce eye-catching graphic panels that will enhance the appearance of the door and lend added design flair to your facility.

Veritas can utilize client-supplied, high-resolution art to produce acrylic panels that are attached directly to the door surface. Panels are provided for both sides of the door, and images may be the same for both sides, or different, depending upon your preference.

Photo and art files are available from a large selection of online providers such as [iStock](#) by [Getty Images](#). Contact your Veritas sales representative for artwork requirements.
